FOR THE NORTHERN DISTRICT OF OHIO  
EASTERN DIVISION**

UNITED STATES OF AMERICA,	)	
	)	
Plaintiff,	)	CASE NO.: 1:21-CR-226-PAB-1
	)	
v.	)	<b>DECLARATION OF ERIC C.</b>
	)	<b>NEMECEK</b>
DAVIS LU,	)	
	)	
Defendant.	)	
_____	)	

Eric C. Nemecek hereby declares as follows to the best of his knowledge and belief:

1. I am a partner at the law firm of Friedman Nemecek Long & Grant, LLC, who were attorneys for Defendant Davis Lu until April 1, 2025. I was one of Mr. Lu's lead counsel at trial. I submit this Declaration regarding Defendant Davis Lu's Motion for a New Trial.

2. One of my responsibilities in this case was to be in charge of handling, organizing, and reviewing discovery materials provided by the government. I am, therefore, familiar with the discovery the defense requested and received from the Government prior to trial.

**Process for Handling, Retaining, and Reviewing Discovery**

3. I maintained, organized, and reviewed all the discovery we received from the Government. The materials that were provided through the electronic portal were downloaded and saved to the firm's internal database. Materials that were provided on an external electronic storage device were maintained on said devices and placed in the physical file.

4. I shared all of the discovery materials we received from the Government with Mr. Lu and our consulting expert, Warner Scheyer. Mr. Scheyer helped our defense team review and analyze the voluminous discovery materials.

5. I do not recall receiving the discovery materials that the Government claims formed the basis of Exhibits 13A and 13B.

**Defense Discovery Requests**

6. On January 13, 2022, the defense team requested additional discovery materials to investigate the Government's claims, craft a defense strategy, and prepare for trial. Among the seven supplemental requests for information, Item Six requested the Government produce "Electrical Enovia server restart logs from SiteScope from January 1, 2019, to December 31, 2019, *including any/all email notifications sent to users.*" (hereinafter, "Item Six") (emphasis added). A true and correct copy of that request is attached as **Exhibit A**.

7. Based on my review of the relevant discovery materials and discussions with Mr. Lu, it is my understanding that Eaton's system would send email notifications to employees whenever the server would crash and/or restart. These emails would have shown the dates on which any system-failure notifications were sent or received by users, including the days when Mr. Lu's code was alleged to have been running on Eaton's servers. Therefore, I believed the documents in Item Six were critical to the defense because, if they did not exist, this absence would contradict the Government's theory that Mr. Lu's code caused the Enovia server failures. The absence of this evidence would also support the defense's theory that Mr. Lu's code did not cause those same failures.

8. On March 11, 2022, the Government responded to the defense request and stated that documents responsive to Item Six "do[] not exist as monitoring stopped on this application in 2013." A true and correct copy of that correspondence is attached as **Exhibit B**.

9. On April 12, 2022, the Government sent another email informing me that certain materials in response to Item Six were available, but only for the dates September 3, 2019 through

December 31, 2019; there was no indication made that there were responsive documents for the month of August, 2019, which was the critical month. The Government represented that the “restart logs/alerts from Sitescope after 40 days [were purged] so those records are no longer available.” A true and correct copy of that correspondence is attached as **Exhibit C**.

10. Two days later, on April 14, 2022, the Government produced the “daily user audit logs for 9/3/2019-12/31/2019” in response to Item Six. A true and correct copy of that correspondence is attached at **Exhibit D**. Notably, the Government did not simultaneously produce any email alerts or notifications.

11. Because the defense believed that this evidence was critically important, on April 26, 2024, we issued a subpoena to Eaton Corporation pursuant to Federal Rule of Criminal Procedure 17(c). Among other things, the subpoena requested “Electrical Enovia server restart logs from SiteScope from January 1, 2019, to December 31, 2019, *including any/all email notifications sent to users*” under Request Nine. (emphasis added). Request Nine is identical to Item Six. A true and correct copy of that subpoena is attached as **Exhibit E**.

12. On May 24, 2024, Eaton Corporation represented that the “documents [responsive to Request Nine/Item Six] are not in our client’s possession, custody, or control at this time.” Eaton Corporation promised to send defense counsel “an update if we learn of the existence of any documents responsive to” Request Nine/Item Six. A true and correct copy of that correspondence is attached as **Exhibit F**.

13. Eaton Corporation never provided the defense with any update regarding these records.

14. The absence of this evidence shaped our trial strategy. The lack of any email alerts or notifications showing that Eaton’s Enovia system crashed on the dates Mr. Lu admittedly

executed the code in August of 2019 corroborated the defense theory that Mr. Lu's code could not have caused the server crashes/hangs, as the Government alleged. This became a key component of Mr. Lu's direct examination.

**Disclosure of Evidence at Trial**

15. On March 5, 2025, Agent Monica Hantz testified as the Government's rebuttal witness. I was sick that day, so I could not attend trial.

16. Exhibit 13A purported to be screenshots of six email notifications/alerts that Mr. Lu received on August 26, 2019, August 27, 2019, and August 29, 2019, which purportedly show that the Enovia servers crashed on those dates. A true and correct copy of Exhibit 13A is attached as **Exhibit G**.

17. Exhibit 13B purported to be a summary chart of 891 email notifications/alerts that the Enovia servers crashed that Mr. Lu purportedly received between June 26, 2019, and September 5, 2019. A true and correct copy of Exhibit 13B is attached as **Exhibit H**.

18. Exhibit 22 purported to be four samples from a 95,000 event-log, which purported to show dates on which there was activity on Mr. Lu's server. A true and correct copy of Exhibit 22 is attached as **Exhibit I**.

19. Prior to receiving Exhibits 13A, 13B, and 22 from the Government on March 5, 2025, I had not seen the documents supporting Exhibits 13A and 13B in discovery.

20. The documents Exhibits 13A and 13B purport to represent are the very documents that would have been responsive to Item Six of the January 13, 2022, correspondence directed to the Government as well as Item 9 of the subpoena that was directed to Eaton in April of 2024.

**Post-Conviction Review of Discovery**

21. Following his conviction, Mr. Lu retained ArentFox Schiff LLP as new counsel to represent him in challenging his conviction in this case. To assist their preparation, I provided them discovery materials we received from the Government.

22. Attorneys from ArentFox Schiff informed me that the Government identified four files that purportedly formed the basis of Exhibits 13A and 13B: (a) “DavisLu\_ExchangeEmail.ad1”, (b) “DavisLu\_ExchangeEmail.ad1”, (c) “DavisLu\_ExchangeEmail.ad2”, and (d) “DavisLu\_ExchangeEmail.ad3”.

23. At their request, I reviewed the discovery the defense received in discovery. Despite multiple reasonable, diligent search attempts, I have not located these documents in our file or on our electronic storage system.

24. Attorneys from ArentFox Schiff also informed me that the Government identified a single file titled “3947.156751345.txt” that purportedly formed the basis of Exhibit 22. The defense received the “3947.156751345.txt” file in discovery. That file is a plain text file, with no formatting. It has 95,000 log entries, some of which span multiple lines. When converted to PDF, it is 15,502 pages long. The log entries identified in Exhibit 22 purport to represent just four log entries amongst the 95,000 log entries contained in the “3947.156751345.txt” file.

I declare under the penalty of perjury that the foregoing is true and accurate to the best of my knowledge, information, and belief.

***Re: United States v. Lu, 1:21-CR-226***

Dear AUSA Riedl,

I hope this correspondence finds you well. As you know, we have retained an expert witness to assist with the defense of this case. After reviewing the discovery materials provided to date, including the additional materials provided in response to our August 8, 2021 request, the expert has identified the following additional records and/or items that are needed in order to render an opinion:

- 1.) Mr. Lu's employment file, including any recent performance reviews.
- 2.) Mr. Lu's worklog for the last year of his employment.
- 3.) All Remedy tickets in EG\_AS\_PLM queue from August 20th, 2019 to August 29th, 2019, including create date, requester full name, queue, issue description, assignee, and resolution.
- 4.) The following files from the source safe repository ("SVN") for August 3, 2019:
  - a.) PLMLoginServlet.class; and
  - b.) IPFilter.class

5.) SVN report detailing the update and last check-in dates from July 1, 2019, through August 31, 2019, for the following files:

Eric,

Additionally, in response to item 6 on your request dated January 13, 2022, Eaton responded that it does not exist as monitoring stopped on this application in 2013. In response to item 4, they stated that they have already provided this data. They are working on getting us the updated SVN logs and I will update you.

Eric,

Regarding Item 6 of your discovery request (Electrical Enovia server restart logs from SiteScope from January 1, 2019, to December 31, 2019, including any/all email notifications sent to users):

Eaton still possesses the Sitescope daily audit logs from 9/3/2019 – 12/31/2019 and can provide them. Eaton purges the restart logs/alerts from Sitescope after 40 days so those records are no longer available

I have asked Eaton to provide me the daily audit logs from 9/3/2019 – 12/31/2019 and I will get them to you when I receive them.

Brian,

I just spoke with our expert. He confirmed that the spreadsheet crops out certain information/text when opened, and that he is unable to expand the columns. He thinks that you/Eaton may have different privileges in the USAfx account that allow you to open and manipulate the document, whereas we might only have viewing privileges. I'm not sure if there's a way to change the file format or some other work-around to resolve the issue. If not, maybe you can simply email me a copy of the spreadsheet and I can forward it to the expert (obviously with the same restrictions on dissemination, etc., set forth in the Protective Order).

Thanks,

**Federal Rule of Criminal Procedure 17 (c), (d), (e), and (g) (Effective 12/1/08)**

**(c) Producing Documents and Objects.**

**(1) In General.** A subpoena may order the witness to produce any books, papers, documents, data, or other objects the subpoena designates. The court may direct the witness to produce the designated items in court before trial or before they are to be offered in evidence. When the items arrive, the court may permit the parties and their attorneys to inspect all or part of them.

**(2) Quashing or Modifying the Subpoena.** On motion made promptly, the court may quash or modify the subpoena if compliance would be unreasonable or oppressive.

**(3) Subpoena for Personal or Confidential Information About a Victim.** After a complaint, indictment, or information is filed, a subpoena requiring the production of personal or confidential information about a victim may be served on a third party only by court order. Before entering the order and unless there are exceptional circumstances, the court must require giving notice to the victim so that the victim can move to quash or modify the subpoena or otherwise object.

**(d) Service.** A marshal, a deputy marshal, or any nonparty who is at least 18 years old may serve a subpoena. The server must deliver a copy of the subpoena to the witness and must tender to the witness one day's witness-attendance fee and the legal mileage allowance. The server need not tender the attendance fee or mileage allowance when the United States, a federal officer, or a federal agency has requested the subpoena.

**(e) Place of Service.**

**(1) In the United States.** A subpoena requiring a witness to attend a hearing or trial may be served at any place within the United States.

**(2) In a Foreign Country.** If the witness is in a foreign country, 28 U.S.C. § 1783 governs the subpoena's service.

**(g) Contempt.** The court (other than a magistrate judge) may hold in contempt a witness who, without adequate excuse, disobeys a subpoena issued by a federal court in that district. A magistrate judge may hold in contempt a witness who, without adequate excuse, disobeys a subpoena issued by that magistrate judge as provided in 28 U.S.C. § 636(e).

Re: *United States v. Davis Lu* – 1:21-CR-226

Dear Attorneys Friedman and Nemecek:

I hope this correspondence finds you well. I write today in response to your April 26, 2024 document subpoena served on Eaton Corporation.

As you are aware, we issued an initial responsive production on May 16, 2024. After engaging in a reasonable and diligent search for documents that were responsive to requests six (6) through eleven (11), it is our understanding that these documents are not in our client's possession, custody, or control at this time. We will, of course, continue to engage in a reasonable level of evaluation to ensure that nothing was missed during our search process, and will be sure to send you an update if we learn of the existence of any documents responsive to these requests.

We appreciate your consideration in providing an extension to the original deadline so that we may ensure the most comprehensive search possible.

Sincerely,

BENESCH, FRIEDLANDER,

The service name indicates the resource to which access was requested. This event can be correlated with Windows logon events by comparing the Logon GUID fields in each event. The logon event occurs on the machine that was accessed, which is often a different machine than the domain controller which issued the service ticket. Ticket options, encryption types, and failure codes are defined in RFC 4120.,62284791
